Reverting Play Store to the default factory version can remove these errors and restore the store to normal. Restarting the Download Manager can help resolve Play Store download failures. You cannot install or update apps if this built-in downloader is disabled or malfunctioning. While this may solve the problem with Play Store, please note that deleting your account may remove some data (contacts, messages, calendar events, etc.) that you've synced with your Google Account. Restart Download Manager Google Play Store downloads apps to your device via Android Download Manager. Go to Settings > Apps and Notifications > Application Information (or View All Apps) > Google Play Services and tap Clear Cache. Restart your device Your device's power cycle is another troubleshooting technique that is worth trying to fix when the Google Play store isn't downloading. If the web page does not load, there is most likely a problem with your internet connection. Date and time of update Some system services and third-party applications may fail due to incorrect data settings. Press OK on the confirmation symbol to proceed. If the problem persists, go back to the Play Store storage page and tap the Delete Storage icon. While some of these updates are error-free, others sometimes include bugs that cause performance issues. Connect to a Wi-Fi connection or data mobile and try the download again. Follow the steps below to do so. 1. Ten. For example, Play Store may not download new apps or update old ones.
